DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on August 13, 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US 7,140,412 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-23 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 7,387,141.

Although the conflicting claims are not identical, they are not patentably distinct from each other because one of ordinary skill in the art at the time of the invention would

have found it obvious to form the sound absorbing member with a width between 40 and 90 percent of the maximum width of the tire (claim 5 positively defines the thickness between 5 and 45 mm).

4. Claims 1-23 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2, 4-6, and 9-16 of copending Application No. 10/564,098. Although the conflicting claims are not identical, they are not patentably distinct from each other because one of ordinary skill in the art at the time of the invention would have found it obvious to form the sound absorbing member with a width between 40 and 90 percent of the maximum width of the tire (claim 1 positively defines the thickness between 5 and 50 mm)

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

5. Claims 1-23 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4 and 6-11 of copending Application No. 10/563,303. Although the conflicting claims are not identical, they are not patentably distinct from each other because one of ordinary skill in the art at the time of the invention would have found it obvious to form the sound absorbing member with a width between 40 and 90 percent of the maximum width of the tire and a thickness between 5 and 50 mm (both limitations are relatively broad and consistent with dimensions commonly associated with layers attached to the inner surface of a crown region).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
